ElectroGas Malta Ltd
Block D Piazza Off St Joseph Street
Marsaskala – MSK 1050
Malta

Subject: Notice to the public – Planned Maintenance – Friday 16 October 2020, 15:00 HRS

Electrogas Malta Ltd. together with their power plant supplier will be conducting predictive maintenance works on the heat recovery steam generators of Delimara 4 in the following weeks. This will be noticeable to the public with additional crane activity on the quay next to the power station.

The works are being carried out as a precautionary measure to ensure that the expected lifetime of the equipment can be guaranteed in all operating conditions. The activity is carried out in stages during the low season of electricity demand on the Maltese Islands and shall therefore have a minimal effect, if any, on the actual dispatch of the power plant. The timing of the works has been carefully planned together with Enemalta and it coincides with other planned maintenance on the facilities. The works will be carried out by a subcontractor of Siemens and great care is taken to ensure the effective use of the downtime, environment and safe working conditions.
