

Specialized Services at the Delimara LNG Terminal

YOUR TRUSTED PARTNER IN LNG TERMINAL SERVICES

Location of LNG terminal: *in the middle of the Mediterranean sea*, close to major shipyards. As LNG demand in Europe increases, Malta serves as a convenient transit and support hub for LNG carriers moving through the Mediterranean.

ElectroGas Malta
LIMITED

Positioned at the crossroads of major maritime routes, ElectroGas Malta enjoys a unique geographic advantage. Malta's central Mediterranean location offers ideal access for LNG carriers moving between Europe, North Africa, and the Middle East. Its sheltered harbour and deep-water facilities make it perfectly suited for safe, efficient gassing-up and cooling-down operations.

Combined with Malta's political stability, advanced port infrastructure, and proximity to key LNG hubs, ElectroGas offers an accessible, cost-effective, and strategically positioned service point. Clients benefit from a reliable partner providing convenience, efficiency, and expertise in LNG handling across the region.

Service Offered

Gassing-up / Cool Down

References: In 2023, we successfully carried out a gas-up, cool-down, and heeling operation for a visiting LNG carrier LNG/C Gaslog Sydney. A total of 74,130 MMBTUs of LNG were delivered upon completion of the process.

This operation demonstrated our capability to safely and efficiently handle specialized LNG services, ensuring compliance with all safety, environmental, and operational standards.
